

## **Innovation on the world stage: NEXAT debuts at Agritechnica 2023**

Rieste, 09/20/2023  
No. 01/2023

From November 12 to November 18, 2023, we will be present for the first time at the renowned Agritechnica trade show in Hanover, Germany, to showcase our innovative technology. The trade show's main theme "green productivity – inspiration and solutions" underscores the importance of sustainability and new technologies in agriculture. We present our all-in-one NEXAT system as a pioneering solution that combines efficiency and regenerative agriculture. Visit us at our booth C04 in hall 3.

Rieste – The anticipation is great, because this year we will be represented for the first time at the world-renowned Agritechnica trade fair in Hanover. Our innovative company will take the opportunity to present our novel system live to an international audience from November 12 to 18. Farmers, professionals and visitors from all over the world can eagerly await our presentation at the fair.

For years, the show has been a venue for discussing the latest innovations in agricultural technology. This year's main theme "green productivity – inspiration and solutions" shows that the sustainable management of our arable land, new drive concepts and new communication and information technologies are increasingly important core factors.

In an environment where agriculture faces multiple challenges, our innovation bridges the gap between vision and reality. Through our all-in-one NEXAT system, we present not only a technological tour de force, but a solution that takes into account the coming challenges of agriculture. Our vision is not limited to efficiency and yield increases. We strive to make regenerative agriculture efficient, economically feasible and ecologically sustainable with fully automated technology.

The Agritechnica trade fair in Hanover, which is considered the world's leading trade fair for agricultural technology, provides the perfect platform for presenting our technology. Visitors can look forward to a fascinating opportunity to experience innovations in agricultural technology up close and explore the exciting possibilities of this innovative process. Please feel free to contact us at our booth C04 in hall 3.

## **Company portrait**

Nexat sees itself as an innovator and initiator of a new and sustainable symbiosis of man and nature in agricultural production. In doing so, the young company draws on the more than 50 years of development and consulting expertise of the founding family Kalverkamp, which is expressed in numerous product developments and awards for leading international agricultural machinery manufacturers.

At the heart of the company's activities is the development, manufacture and sale of Nexat revolution, a globally unique new crop production system. With the help of a holistic, systemic approach, Nexat is pursuing the goal of making climate-neutral agriculture possible worldwide.
